---

iFile Lite is a desktop based, easy to use application developed by IRIS, India's leading XBRL company, to help companies meet the Ministry of Corporate Affairs' (MCA) mandate for filing their Annual Financial Statements, Cost Audit and Compliance reports in the XBRL format.

Based on Microsoft Excel, it makes available predefined regulatory compliant templates for capturing data. The output generated is in XBRL format and ready to be filed with MCA. The application is simple to install and a delight to use.

Features

- Based on Microsoft Excel
- Option to upload Source document in .xls/.xslx or .doc/.docx format
- Color coded interface and toggle feature for navigation
- Error prevention and detection tools
- Auto calculation of totals and sub-totals
- Ability to check the output document at any point of time
- Dimension table compliant
- Annual Accounts, Cost Audit & Compliance Reports

Disclosures - Auditors report

Product Description

The desktop-based spreadsheet plug-in allows the user to upload the financial data directly from the source file to generate XBRL filings for annual financials, cost audits and compliance reports. Moreover, with auto-tagging feature the user can automatically map the financial data to the taxonomy from the source document.

About IRIS

With over seven years of experience in the XBRL space, IRIS is India's leading provider of XBRL based solutions and services and a direct member of XBRL International. IRIS has been implementing XBRL solutions and services across the globe, and is associated with all XBRL implementation in India till date. IRIS has played a pioneering role in the XBRL adoption history of India, implementing XBRL solutions for the RBI, SEBI, BSE and the NSE. IRIS also has played a key role in developing the XBRL taxonomies for the ICAI, Reserve Bank of India, SEBI as well as the MCA itself.

The application comes with a color-coded interface and toggle feature that makes the navigation easy for the user. In addition, a default computation feature is available in the spreadsheets that allows auto-calculation of sub-totals and totals. Moreover, in- built error -detection and prevention tools would prompt the user for any inconsistencies, inaccuracies or deviations in data input. iFile Lite application also comes with a validation tool to ensure conformance to XBRL 2.1 specifications.
